Crossover

Inspired by the meeting of nature and city life, this collection blends muted tones and organic concrete forms to create a striking balance between natural landscapes and urban spaces.

The interplay of the raw beauty with the heterogeneous texture and colour of concrete is perfect for modern, design-neutral interiors - especially investment interiors.

The effect of consistency was enhanced by the use of crossover technology, which makes it possible to achieve colour consistency of the tile cross-section with its surface by colouring the mass. The manufacturing process has ensured high performance parameters, including dimple abrasion or slip resistance.

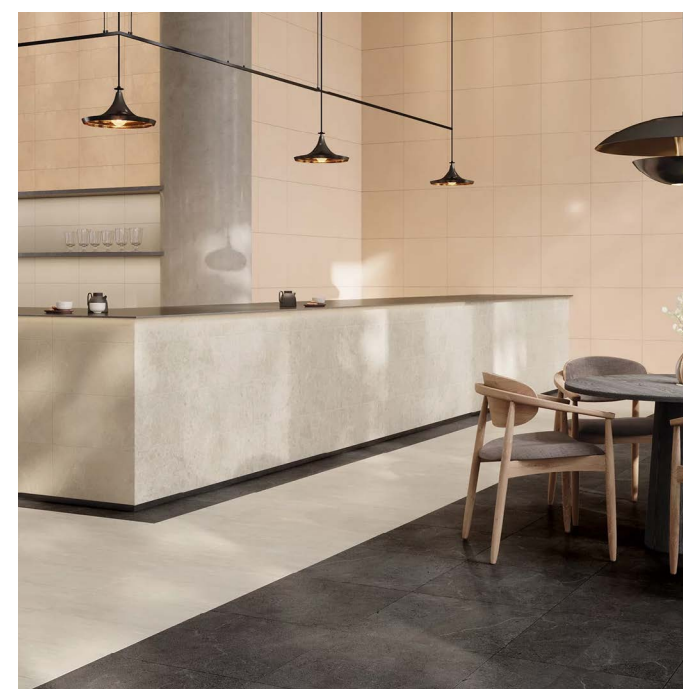

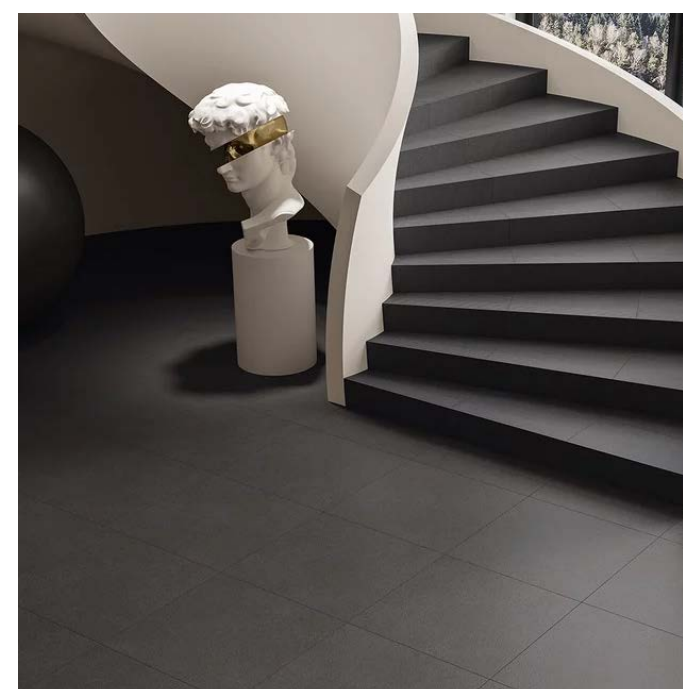

Combining the raw beauty of concrete with rich texture and tonal variation, these tiles are ideal for modern, versatile interiors.

Advanced crossover technology delivers consistent colour throughout, while high-performance durability ensures excellent wear and slip resistance.
